SUMMARY

A hardworking Information Technology graduate with strong leadership, organizational, social, and coding skills. I have progressive experience in writing code and designing solutions. I am eager to bring these abilities to your organization, keen to learn new things, and excited to immerse myself in a new professional environment while advancing my career. **Available to start working early October.**

EDUCATIONAL BACKGROUND

Universiti Teknologi PETRONAS (UTP)   **(May 2021-August 2024)**

Bachelor of Information Technology (Hons)

Major: Data Analytics, Minor: Financial Management

CGPA: 3.20

Univesiti Teknologi PETRONAS (UTP)   **(May 2020-April 2024)**

Foundation in Information Technology

CGPA: 3.52

WORK EXPERIENCE

Net Geometry Sdn. Bhd.   **(January 2023- August 2023)**

Information Technology Administrator (Industrial Internship)

- Work closely with Technologies and Solutions department in testing software applications to ensure they are functional, reliable, and meet quality standards.
- Designed a comprehensive and integrated education suite that enhances learning experiences and streamlines administrative processes.
- Participated in project planning activities including requirements gathering, requirement analysis, resource planning, and infrastructure planning.

Delivered Internship Project

IIOT system management dashboard

- Provided a dashboard for a local project to monitor the sensors that were used with a simple interface where the user can monitor the sensor performance, the sensor conditions and also the sensors locations.
- Identified and learned the critical components to build a dashboard: objective and purpose, user interface, layout and organization, interactivity and data visualization.

RESEARCH PROJECTS
